

DEHUMIDIFIER

FEATURES:

- Dehumidification at ambient condition
- 30°C~80%RH: 12litres per day
- Power Rated: 220~240Vac/50Hz
- Consumption: 270watts
- Dehumidifying capacity: 0.5kg / hour
- Compressor Type: Rotary QX42H
- Refrigerant: R-134a in 120g
- Capacity of water reservoir: 1.65L
- Air volume: 88.8 CBM/per hour
- Noise Level: 52 dB
- N.W.: 11.5kg / G.W.: 13.0kg
- Safety Approval: CE
- Product dimension: 53.6 x 34.8 x 21.0cm approx (subject to change)
- Automatic Fan defrosting

Normal dehumidifying condition: 16C to 35C

A working cycle of room temperature in between 15C to 5C compressor works 40minutes to dehumidify then cut off, and blower keeps running 10minutes to defrost.

- Ambient Humidity / Temperature display monitor
- Humidity setting: 30%~80% with steps of 5%
- Two fan speeds
- Pre-filter removes dust & eliminates larger floating pollutant particles.
- Optional permanent drain facility is available.
- Built in temperature sensor
- Working range: 5C to 35C
- Portable design
- Easy – Glide Bottom Castors
- Ambient room temperature & humidity auto display
- Water reservoir processed by "anti-bacteria" formula to prevent the propagation of mold, bacteria etc.
