

EXTREME

A/C Leak Stop

What is it?

Extreme is specifically designed for the safe repair of small refrigerant gas leaks that frequently occur with metal and rubber vehicle A/C system components.

How does it work?

The critical ingredients of Extreme are triggered into action only when there is a leak, mechanically building a flexible permanent seal.

Benefits

- Permanently seals refrigerant leaks in both metal and rubber system components
- Ideal preventative - reacts to leaks through 12 months
- Highly visible with UV lamp
- Significantly reduces compressor noise and vibration
- Cartridge System - Inject Directly - Maximum System Port Pressure - 5,5 bar (80 psi.)
- Push&Fill System - Inject Directly - Maximum System Port Pressure - 11 bar (160 PCSi.)

Technical Benefits

- Safe - harmless to system and recovery components
- Non reactive to humidity and air
- Compatible with all refrigerant gases
- Polymer-free - Does not clog system compressor or recovery machine
