

Features:

- Two Stage Design – second stage starts pumping at a lower pressure to pull a deeper ultimate vacuum
- Offset Rotary Vanes – Our proven design creates the deep vacuum conditions needed for a thorough evacuation
- Gas Ballast feature – helps keep the pump oil clean by reducing condensation of moisture
- Iso-Valve™ – isolates pump from the system with just a 1/4 turn, making it simple to measure rate of rise
- Integral Check Valve – prevents pump oil from being sucked into the system if a power loss occurs
- Die-Cast Aluminum housing – lightweight but durable
- Molded Base – Durable polycarbonate base improves pump balance and minimizes vibration
- 110-127V/220V (selectable), 50/60 Hz, 236 l/m at 50 Hz,
- Weight: 38 lbs (17.24kg)
- Safety: CE

SPECIFICATIONS

Free Air Displacement:	10 CFM
Number of Stages:	Two
Factory Micron Rating:	20 microns
Intake Fitting:	1/4" MFL and 1/2" MFL Tee
Oil Capacity:	16.5 oz. (488 ml)
Motor Size:	1/2 HP
Voltage:	110-127V/220V (selectable), 50/60 Hz, 236 l/m at 50 Hz,
